# A. W. BEATTIE CAREER CENTER SUMMER CAMPS

## Automotive Mania

Campers will be introduced to basic fundamentals and safe working conditions. They will explore fluid examinations, tire pressure, overview of engines, and use of scan tools used in the Auto Tech industry. (Half Day Camp)

## Babysitting Boot Camp

A four day camp designed for 11 - 14 year olds interested in becoming a babysitter. Infant, child, and adult CPR as well as First Aid basics will be taught. Campers will plan and discuss child-appropriate, fun and engaging activities designed to work all three areas of a child's development (Half Day Camp)

## Beauty 101

The focus of this camp is to teach the basic concepts of hair care, skin care, nail care and make-up applications. Students will be mentored by one of our Cosmetology students and will perform services on themselves or a mannequin. The mannequin will be provided. (Half Day Camp)

## Chess Champions

The focus of this camp will be for the students to get enjoyment out of the game of chess. Each day a new topic will be introduced. Students will learn the rules of the game, how to play, learn strategy, planning, and basic tactics, and how to keep score. (Half Day Camp)

## Construction Workers, Inc.

Campers will utilize the same building techniques as used in the residential building industry to build a scaled down model of Fallingwater. Shop safety, hand/power tool usage and blueprint reading are also a part of our four-day camp. The students will take their model and a starter tool set home with them to remember their great experience for years to come. (Half Day Camp)

## Cooking 101

Students will learn how to make and present a variety of foods over the 4 camp days. (Full Day Camp)

## Crafty Baking

At this year's Pastry Arts Crafty Baking Summer Camp, we will create cute birdy dinner rolls, dirt and worm flowerpots, other bugs (that we will create), decorate with meringue mushrooms plus a LOT more! (Half Day Camp)

## Digital Art Explorers

Are you a creative person? Do you like making artwork or taking pictures? Do you like using computers? We have we got the camp for you! In this high design exploratory camp, you will have a chance to combine all of those great interests in one place. We will visit a different design technology skill each day of the camp. We will spend a day on lighting and digital photography, a day editing digital photos and learning about Adobe Photoshop, another day learning how to draw digitally with Adobe Illustrator, and a final day using production equipment like a laser engraver or sublimation printer. Put your artistic talents to the test in a digital environment! (Half Day Camp)

## HVAC Fixers

Students will enjoy learning while gaining satisfaction from seeing their progress at the end of the day. Campers will learn HVAC safety rules; install an electrical circuit with switches, lights, and outlets; construct a copper tubing project including soldering, cutting, and bending; and construct a metal toolbox from sheet metal using shop tools and basic hand tools. Students will take home their tubular project and metal box. (Half Day Camp)

## RoboCamp

Using the VEX V5 system, groups of students build robots based on an engineering challenge. In the process, they learn engineering design principles, problem solving, coding and robotics integration skills. Students gain hands on experience by designing, fabricating and assembling prototype mechanisms, developing related software code, and continuously improving their initial design to produce the best possible robot performance in a 2v2 robotics competition. (Full Day Camp)

## Take It To The Sky

Students will learn FAA regulations, situational awareness, and proper care for flying a drone. A combination of class and flying time will help reinforce topics discussed. Students will be able to earn their FAA TRUST certificate by the end of camp. Drones will be provided for training. (Half Day Camp)
